

## U.S. Geological Survey Student Employment Program

This is an entry level position for an undergraduate student for lab work.  
No previous experience is required.

### Lab Duties:

- Prepare sediment samples for analytical analysis: weigh, label, dry, hand-grind, sieve, and subsample
- Clean labware following USGS standards
- Ship samples to various analytical labs following USGS standards and using chain of custody procedures
- Manage, track, document, and archive sample inventory
- Use spreadsheet and word processing software to input and track lab data and records

Location: Austin, TX

Employment Dates: September 11, 2006 – December 31, 2006

Rate of Pay: Undergraduate student with 1 year of college – \$10.81/hr  
Undergraduate student with 2 or more years of college – \$12.14/hr

Interested applicants should submit a resume that includes the following information:

- Full legal name
- Local mailing address
- Local telephone number
- Email address
- Citizenship; if not a U.S. citizen, immigration/VISA status
- Education
- Previous work or volunteer experience
- Copy of most recent transcript

Send resume by postal or electronic mail to:
