(3 hours) ⁷          | Government  
(3 hours) ⁷          |

The courses listed in this suggested four year plan will meet degree requirements for this degree, and the plan is designed to give EVS students up to two years to determine which of the three EVS tracks they wish to pursue while remaining on schedule to graduate within four years. However, EVS students are free to choose their track any time after completing the Introductory Field Seminar (EVS 311).

For more information about the EVS Program, please visit the Program website at [www.esi.utexas.edu/EVS](http://www.esi.utexas.edu/EVS) or talk to your academic advisor with any questions about your individual circumstances.

---

1. Satisfies both the “Geological Sciences Course in Sustainability” requirement for the EVS Degree and the Core Curriculum requirement for a UGS Signature Course.
2. Honors Introduction to Genetics (BIO 315H) may be taken in place of Introductory Biology (BIO 311C & BIO 311D).
3. Honors Chemistry I & II (CH 301H and CH 302H) make be taken in place of Principles of Chemistry I & II (CH 301 & CH 302).
4. The two-course sequence of Differential Calculus (M 408N or M 408K) and Integral Calculus (M 408S or M 408L) may be taken in place Differential & Integral Calculus (M 408C).
5. Part of the University Core Curriculum. Consult the University Core Curriculum for more information on allowable courses.
6. Introduction to Geology (GEO 303) may be taken in place of Physical Geology (GEO 401).
7. Part of the University Core Curriculum, which requires 5 hours of coursework in Texas and American Government. American Government (GOV 310L) or its equivalent is required of all students. The second half of the requirement may be satisfied with Issues & Policies in American Government (GOV 312L), Constitutional Principles: Core Texts (GOV 312P), or America’s Constitutional Principles: the Challenge of Equality (GOV 312R).
8. Students choose one from the following courses: Geographic Information Systems (GEO 327G); Environmental Geographic Information Systems (GRG 360G); or Introduction to Remote Sensing (GRG 462K).
9. Microeconomics (ECO 304K) satisfies both the EVS Environmental Economics, Sustainability & Business Requirement (10d) and the University Core Curriculum Social & Behavioral Sciences requirement. All EVS students may choose instead to take Environmental Resources & Economic Growth (ECO 330T) to satisfy the EVS Economics Requirement.
10. Mechanics with Lab (PHY 301 & PHY 101L) or Engineering Physics with Lab (PHY 303K & PHY 103M) may be taken instead of General Physics with Lab (PHY 317K & 117M).
11. All EVS students are also required to complete two courses beyond RHE 306 (or its equivalent) identified with a writing flag, one of which must be an upper division course. Beginning in Spring 2014, this upper division writing flag can be obtained through with EVS 331, leaving all EVS students with one additional writing flag to obtain while satisfying their other degree requirements.

</tbody>
</table>

---

1. Electricity and Magnetism with Lab (PHY 316 & PHY 316L) or Engineering Physics I with Lab (PHY 303L & PHY 310L) may be taken instead of General Physics II with Lab (PHY 317L & PHY 117N).
2. Consult with your academic advisor visit the EVS Program Website at www.esi.utexas.edu/EVS (under Current Students) for a list of approved courses for this requirement.
3. Part of the University Core Curriculum, which requires 6 hours of American History (3 of which may be in Texas History). Consult the University Core Curriculum for more information on allowable courses.
4. Please consult your academic advisor about potential restrictions on what courses may count as electives towards your degree.
5. Please consult with your academic advisor for a list of approved foreign language and cultures courses. Note that the College of Natural Sciences (Biological Track) is not identical to the approved list at the College of Liberal Arts (Geography Track) and courses for Biology Track students must be chosen from the Natural Sciences list.
6. Marine Ecology (MNS 320) with either Marine Ecology Lab (MNS 120L) or MNS 152T (Topic: Marine Ecology) may be taken in place of BIO 373 & 373L (Ecology & Ecology Lab). Note that MNS 320 may not be used to satisfy both the Climates & Oceans requirement and the Ecology requirement.
7. Honors genetic (BIO 325H) can be taken in place of Genetics (BIO 325) if the student took Honors Introduction to Genetics (BIO 315H) in place of Introductory Biology (BIO 311C & BIO 311D).
8. Consult with your academic advisor visit the EVS Program Website at www.esi.utexas.edu/EVS (under Current Students) for a list of approved courses for this requirement. Students must use a lab or field course to satisfy either their Physiology & Neurology or Taxon-Based Diversity requirement, or they will need to take an additional field or lab course. Additionally, if a student completes one of these requirements by taking 3 hours (rather than four), an additional 1 hour of electives may be taken to complete the 120 hours required for the degree.
9. Please consult with your academic advisor for a list of approved foreign language and cultures courses. Note that the College of Liberal Arts (Geography Track) is not identical to the approved list at the College of Natural Sciences (Biology Track) and courses for Geography Track students must be chosen from the Liberal Arts list.
10. Students pursing the Geography Track can take Field Techniques (GRG 373F) or Field Methods in Landscape Characterization (GRG 373K) instead of completing a Senior Research Experience.
11. A list of courses satisfying the Cultural Expression, Human Experience, and Thought (CEHET) requirement is available from the Geography academic advisor or on the College of Liberal Arts website.
12. The Geography Track requires students complete 30 hours of approved geography coursework, but students may use a course to satisfy both a Prescribed Requirement and this 30-hour requirement provided the course is approved for both requirements. The degree plan presents three opportunities for this to occur: (1) Geography Track students will complete 3 hours of their 30-hour requirement by taking Landscape Ecology (GEO 335H) as part of their Prescribed Requirements; (2) Geography Track students may complete another 3 hours of their 30-hour requirement by taking Climate Change (GEO 333K) or Environmental Change & Management of Large Rivers (GEO 365T) as their Prescribed Climates & Oceans Requirement; and (3) Geography Track students may complete another 3 hours of their 30-hour requirement by taking Environmental Geographic Information Systems (GEO 308G) as their Prescribed GIS Requirement or another 4 hours of their 30-hour requirement by taking Introduction to Remote Sensing (GEO 462K) as their Prescribed GIS Requirement. Please note that permitting a course to count towards two requirements is an exceptional exception.
13. The course taken to satisfy the College of Liberal Arts social science requirement must be from a field taught in the College of Liberal Arts and must be in a different field of study from the course used to fulfill the university core social science requirement. Courses that satisfy the university social science requirement can satisfy the college requirement, and a list of additional courses that can satisfy the college requirement is available from the Geography academic advisor or on the College of Liberal Arts website.
14. EVS students typically use Microeconomics (ECO 304K) to satisfy the university’s Core Curriculum Social Science requirement, therefore Geography Track students will need to complete a social science outside of the field of Economics.
